AQUATIC WEED CONTROL SHORT COURSE

May 4-7, 2015

Fort Lauderdale Coral Springs Marriott Hotel
Coral Springs, FL

www.conference.ifas.ufl.edu/aw

Course Overview

The annual Aquatic Weed Control Short Course is hosted by the University of Florida and brings together more than 450 applicators, educators, and industry representatives to learn new techniques and refresh core competencies in aquatic and upland weed control. This course focuses on invasive and exotic species affecting Florida and provides many networking opportunities so that participants may share field experiences and lessons learned.

The Short Course is generally divided into two types of sessions: General sessions which cover CORE standards and concurrent sessions on Aquatics and Right-of-Ways & Natural Areas. The course also features a number of special sessions which include Live Plant ID and Hands-On Calibration Training. Participants have the flexibility to attend multiple sessions in order to reach their CEU credit quotas.

For those looking to become licensed applicators, CORE and category testing is offered at the conclusion of the course, as well as an exam study session the evening before exams.

Who Should Attend

The Aquatic Weed Control Short Course is designed to benefit those new to the industry and experienced professionals seeking a comprehensive update. You will benefit from attending this program if you:

- Need Florida Pesticide Applicator CEUs for categories such as:
 - Aquatic
 - Right-of-Way
 - Natural Areas
 - General Standards (CORE)
 - Forestry
- Are responsible for aquatic weed control in canals, lakes, golf course ponds, rivers, parks, residential developments and other waterways.
- Are employed by a public agency or private company which is responsible for vegetation management along right-of-ways and in natural areas.
- Are an employee of a basic manufacturer or a distributor that markets aquatic or vegetation management herbicides.
- Use biological control techniques to suppress aquatic weed growth.
