

# The Time has come for the Next Agricultural Revolution

*'Refreshingly fluent narrative, brimming full of stories and metaphors'*

Tim O'Riordan, University of East Anglia, UK

*'A great balance between storytelling and analysis which points to the critical need for gaining control over resources'*

Jacqueline Ashby, CIAT, Colombia

*'Full of supporting evidence and clear arguments'*

Norman Uphoff, Cornell University, US

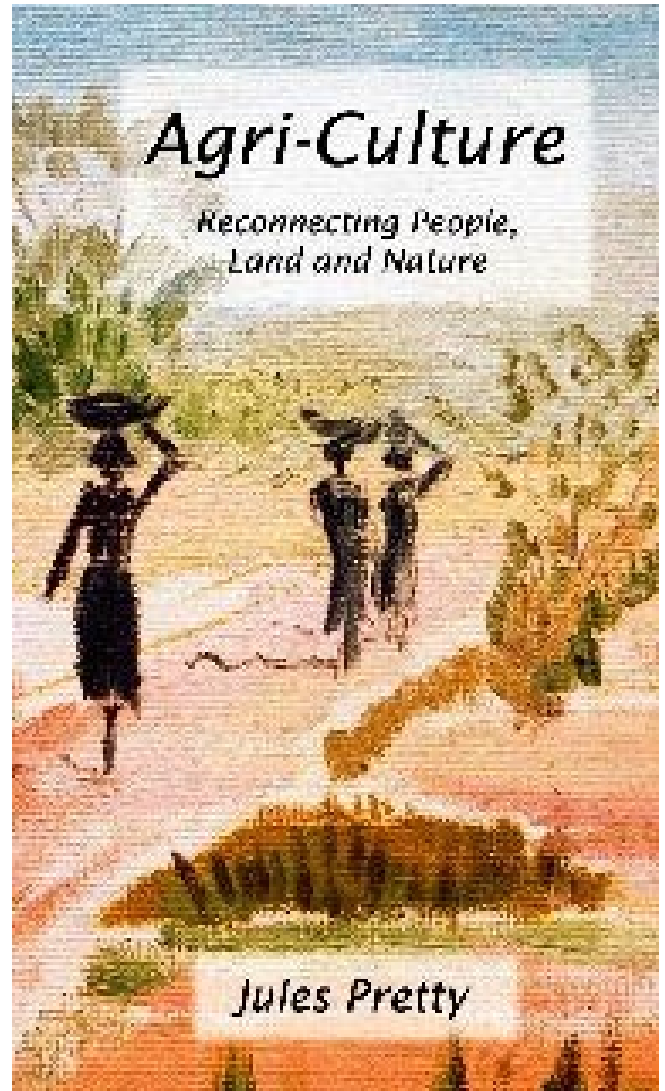

*'A superb volume. This is a valuable monograph that all policy-makers, scholars and farmers must read to understand their roles and responsibilities'*

Vo-Tong Xuan, Angiang University, Vietnam

Something is wrong with our agricultural and food systems. Despite great progress in increasing productivity in the last century, hundreds of millions of people remain hungry and malnourished. Can nothing be done or is it time for the expansion of another sort of agriculture, founded on more ecological principles, and in harmony with people, their societies and cultures?

This book draws on many stories of successful transformation. A sustainable agriculture making the best of nature and people's knowledge and collective capacities has been showing increasingly good promise.

Everyone is in favour of sustainability, yet few go seriously beyond the fine words. This book shows that there is no alternative to radical reform of national agricultural, rural and food policies and institutions.

## CONTENTS

Preface to a Revolution • Landscapes Lost and Found • Monoscapes • Reality Cheques • Food for All • Only Reconnect • Genetics Controversies • Ecological Literacy • Crossing the Internal Frontiers  
• *Bibliography, Index*

**Jules Pretty** is Director of the Centre for Environment and Society, University of Essex. He was formerly at IIED, London. Other titles include *The Living Land*, *Regenerating Agriculture* and *The Hidden Harvest*

**Agroecological Innovations:** Increasing Food Production with Participatory Development

*Edited by Norman Uphoff*

A groundbreaking collection of innovative, successful and diverse approaches to agricultural development. Documented in 12 case studies, these approaches draw upon greater knowledge, skill and labour input, rather than on larger, unsustainable capital expenditure, and are shown to increase yield substantially, sometimes doubling or tripling output.

Pb £18.95 US\$29.95 1 85383 857 8 • Hb £50.00 US\$ 82.50 1 85383 856 X

**Dynamics and Diversity:** Soil Fertility and Farming Livelihoods in Africa

*Edited by Ian Scoones*

*'Dynamics and Diversity is to be recommended not just for the information and insights it provides with respect to the specific issue of soil fertility management, but also because of the major questions it provokes about the application of scientific research to the challenges of sustainable agriculture in Africa'*

Mike Swift, Director, Tropical Soil Biology and Fertility Programme, Nairobi

Pb £16.95 US\$29.95 1 85383 820 9 • Hb £45.00 US\$75.00 1 85383 819 5

**Farmer Innovation in Africa:** A Source of Inspiration for Agricultural Development

*Edited by Chris Reij and Ann Waters-Bayer*

One of Africa's major untapped resources is the creativity of its farmers. This book presents a series of clear and detailed studies that demonstrate how small-scale farmers experiment and innovate in order to improve their livelihoods, despite the adverse conditions and lack of appropriate external support.

Pb £18.95 US\$32.50 1 85383 816 0
