

# 12<sup>th</sup> International Symposium on Biogeochemistry of Wetlands

April 23-26, 2018 | Coral Springs, FL, USA

## Join Us!

### Protecting the Future of Water

This international symposium provides a framework for scientists to share technical information on various topics related to coupled biogeochemical cycling of macro-elements and associated organic and inorganic contaminants.

**Session Proposals Due: Friday, August 11, 2017**

**Abstracts Due: Monday, November 13, 2017**

### Who Should Attend?

If your work involves nutrient or contaminant cycling in wetlands and aquatic ecosystems, carbon science, or aquatic restoration and management, you should be at this conference. When you leave this symposium, you will walk away with the most up-to-date information on wetland biogeochemistry research and application in addition to other valuable benefits.
