

Comprehensive Everglades Restoration Plan RECOVER Five Year Plan

Session #18

2017 GEER Conference

April 18, 2017

Team of Professionals Making Tomorrow Better

Call to Action

BUILDING STRONG

- Over 10+ years of monitoring data
- Current pace of Comprehensive Everglades Restoration (CERP) implementation known
- Integrated Delivery Schedule (2016) developed
- New knowledge gained on major drivers and stressors such as climate change and exotics
- CERP Programmatic Adaptive Management Plan (2015) completed
- Need a long term strategy for monitoring and reporting on interim goals and targets progress

Development of the Five Year Plan

BUILDING STRONG

- RECOVER Leadership Group tasked the development of a steering committee
- Interagency steering committee membership consisted of USACE, SFWMD, Everglades National Park, NOAA, USEPA, USGS, FDACS, and USFWS
- Incorporating new information into monitoring, modeling, and other components of the existing science framework.
- Developed Six Focus Areas: Science Integration, Adaptive Management, CERP Implementation, Interim Goals, and Interim Targets
