

**June 5-10, 2022**

GGAA will feature highly respected and internationally renowned speakers, who will present research on the mitigation, measurement and modeling of greenhouse gases. In addition, the meeting will serve as a platform to discuss on-farm strategies and policies to address the challenges associated with agricultural practices and their impacts.

**UF | IFAS**  
UNIVERSITY of FLORIDA

**Abstract Submissions Due: November 5, 2021**

GGAA 2022 is a great opportunity to learn the latest scientific research and form international collaborations. If your work focuses on agricultural practices and their impact on greenhouse gases, you should attend this conference!

## **You'll learn the latest on:**

- Scientific research being conducted worldwide
- On-farm practices and policies to address emission challenges
- New developments in the field for measuring, modeling and mitigating greenhouse gases

## **Additional benefits include:**

- Enhance your existing knowledge in greenhouse gases and animal agriculture
- Connect for scientific collaborations by meeting researchers from various countries
- Increase your chances of getting your work published and indexed
- Submit an abstract and share your work! **Abstracts are due November 5, 2021**

---

**Become a sponsor and showcase your company's products and services!**
