

Florida Marine Mammal Health Conference VI

Defining and Maintaining Healthy Aquatic Ecosystems

The purpose of this conference is to address aquatic ecosystem health issues impacting marine mammals and other aquatic species in Florida. This conference will provide a forum for issues affecting Florida's aquatic species, and provide an opportunity to review the impact environmental change has on their current health status, discuss future directions of investigation, and determine actions likely to produce benefits to their health and survival.

Visit our website for sponsorship packages and registration information. Questions? Contact **Kristin Zupancic** at kzupancic@ufl.edu or 352-294-3582.
