

What determines whether or not adaptive management programs affect management and policy decisions?

David Marmorek, Lorne Greig, Carol Murray, Don Robinson
ESSA Technologies Ltd., Vancouver B.C.

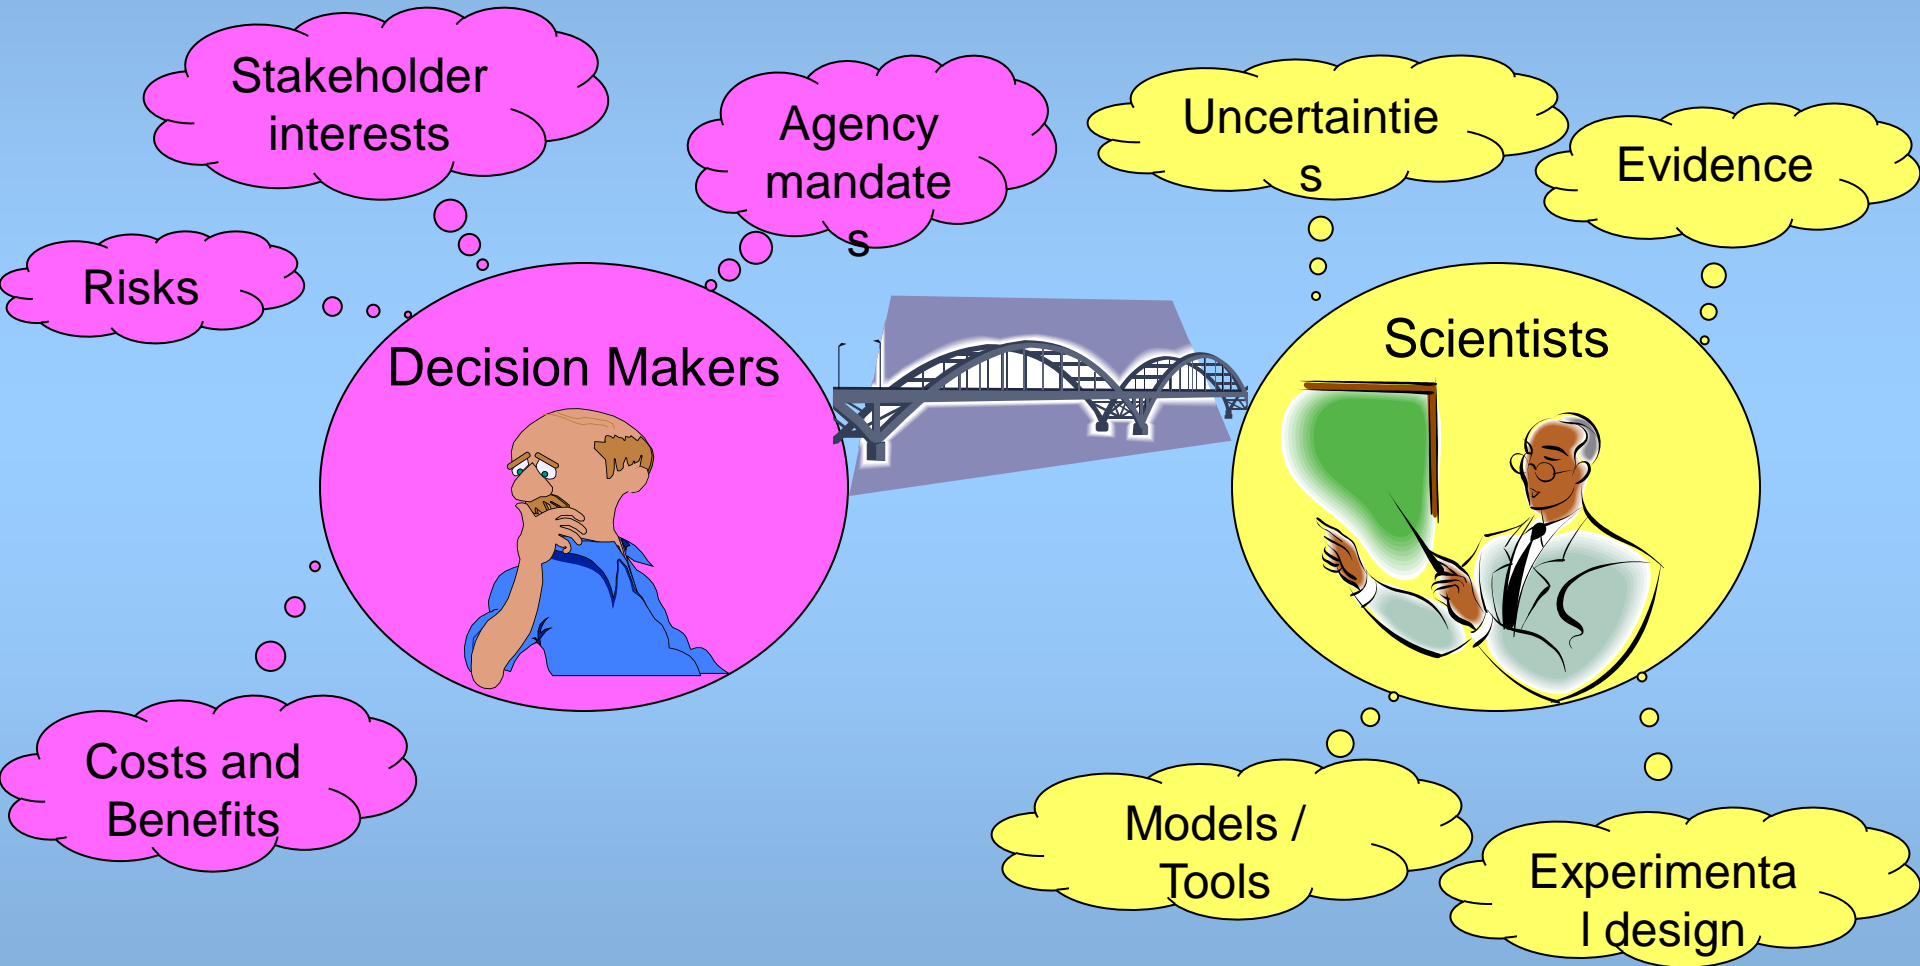

NCER – Aug 4, 2011 – Baltimore MD

Where our ideas come from

- 2001: workshop on factors which enable / inhibit AM (for U. Washington - *handout*)
- 2006: study of 20 adaptive forest management projects (for NCSSF)
- 1979-2011: Toolbox from various AM projects across North America

Bridging the decision-science circles in AM projects

The Forest AM Study

Potentially Enabling Factors (from UW workshop)	Forest AM Projects (20)	
	“Success” (14)	“Failure” (6)

5 tools for building bridges

Decision Makers

Scientists

1. Water Use Planning Process

www.bchydro.com

Policy Group

Generate alternative strategies
Review outcomes, tradeoffs
Converge to preferred option

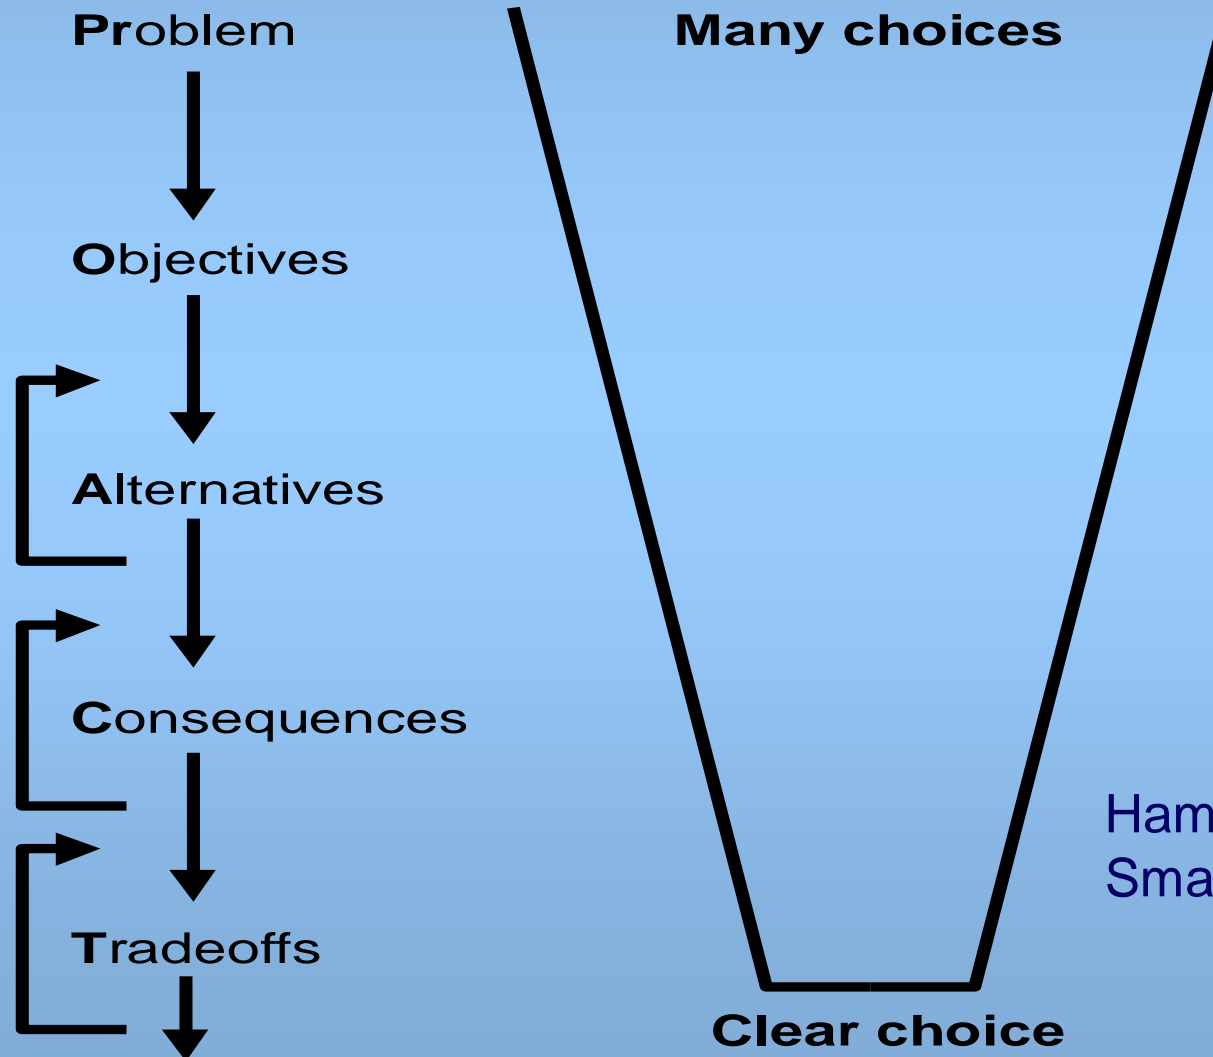

Technical Group

Convert strategies into actions
Simulate actions & outcomes
Summarize tradeoffs

2. Decision Analysis

PrOACT Approach

Hammond et al. 1999.
Smart choices.

3. Data Quality Objectives Process

1. State the problem
2. Identify the **decision**
3. Identify inputs to the **decision**
4. Define the study boundaries
5. Develop an “if-then” **decision** rule
6. Specify limits on **decision** errors
7. Optimize design for obtaining data

*Avoid the Path of
Endless Questions*

4. Simple Outputs for Managers

Output Viewer - Rollup View

Performance Measure	Description		Multi-Year Rollup	% Poor	% Fair	% Good
---------------------	-------------	--	-------------------	--------	--------	--------

Historical flows – No gravel augmentation

CH - Fall	Weighted useable area - spawning	<input type="checkbox"/>		5	39	56
CH - Late Fall		<input type="checkbox"/>		23	32	45
CH - Spring		<input type="checkbox"/>		16	24	60
CH - Winter		<input type="checkbox"/>		12	28	60
ST1		<input type="checkbox"/>		19	40	41

Historical flows – gravel augmentation

CH - Fall	Weighted useable area - spawning	<input type="checkbox"/>		5	32	63
CH - Late Fall		<input type="checkbox"/>		23	26	51
CH - Spring		<input type="checkbox"/>		9	21	70
CH - Winter		<input type="checkbox"/>		7	25	68
ST1		<input type="checkbox"/>		7	19	74

But linked to details for scientists...

Select individual scenario x PM x year results of interest for more detailed outputs

SacEFT - Chinook & Steelhead Redd Dewatering Report

Within-year details in Excel

5. Choose the right tools

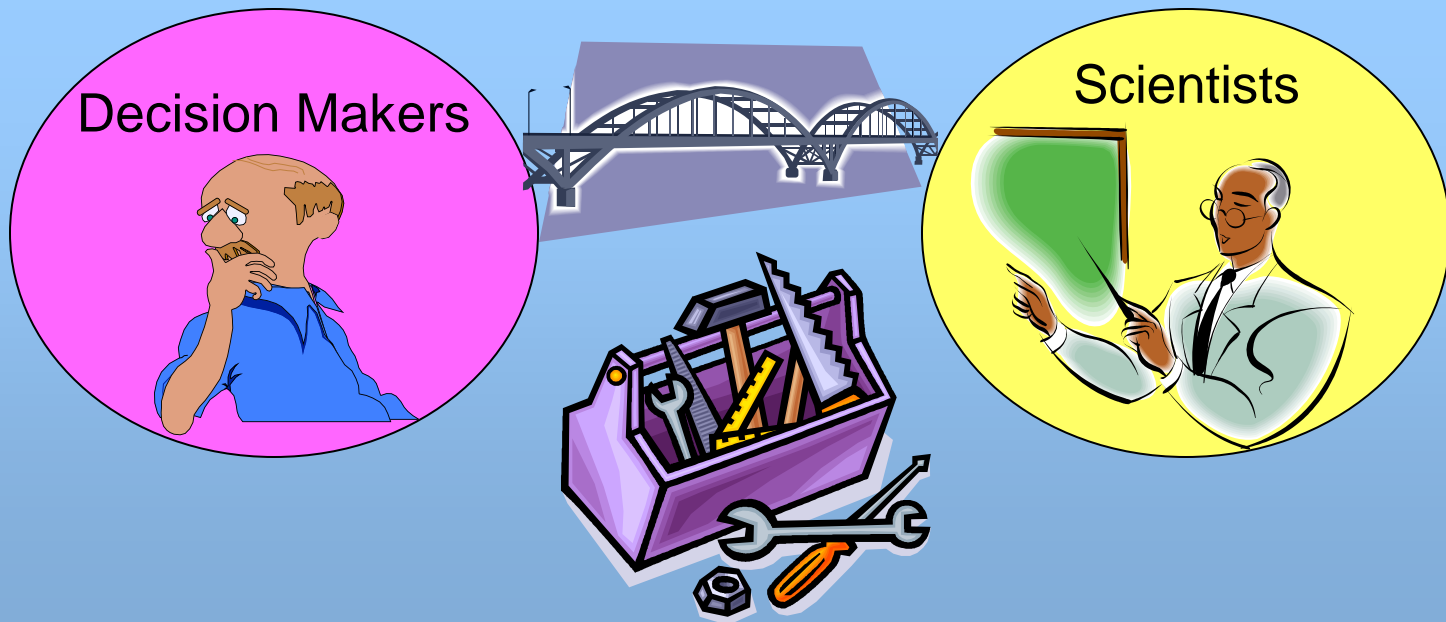

Problem	Tools
<i>Disagree on desired outcomes, objectives.</i>	Conflict resolution through negotiation
<i>Disagree on <u>how to</u> achieve outcomes.</i>	Science syntheses, research, pilot studies, adaptive management.

And finally...

Change occurs when the consequences of retaining the status quo are worse than the consequences of trying something new.

Thanks!
