ECOSYSTEM RESTORATION VIA PASSAGE OF LAKE STURGEON AT FIVE HYDROELECTRIC DAMS ON THE MENOMINEE RIVER

JESSE WALDRIP, P.E. FISH PASSAGE ENGINEER

US Army Corps of Engineers®

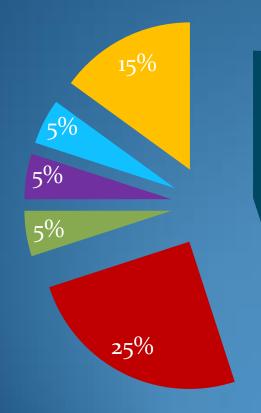

a Joint Venture

PROJECT BACKGROUND

Lake Michigan Tributary Rivers with Known Sturgeon Spawning

45%

Menominee River
Peshtigo River
Mushegon River
Fox River
Oconto River
All Other Rivers

Menominee River

BENEFITS OF STURGEON PASSAGE ON THE MENOMINEE RIVER

Currently Available Habitat
2.75 miles of river
Currently produces few fish

 Passage at Menominee and Park Mill
 Would open 21 miles of river

Passage at Grand Rapids
Would open 30 miles of river

• Passage at White Rapids and Chalk Hill

• Would open 32 miles of river

FISH PASSAGE FEASIBILITY STUDY

<u>Project Team</u>

Engineers Fishery Biologists Regulatory Specialists

- Economists
- Ecologists
- Archaeologists

Scope of Work

- Identify Fish Passage Alternatives
- Review Engineering Feasibility
- Review Hydrology and Hydraulics
- Review Costs and Economics
- Review Habitat Benefits
- **Review Historical and Cultural Impacts**
- **Review Real Estate Constraints**

FISH PASSAGE FEASIBILITY STUDY Alternatives Considered for Sturgeon Passage

Upstream Passage

- Fish Elevators
- Nature-like Fishways
- Vertical Slot Fishways
- Downstream Passage
 - Close Spaced Trash Racks
 - Angled Bar Racks
 - Exclusion Nets
 - Louver Structures
 - Induced Flow Devices

- Dam Removal
- Trap and Transport

- Surface Bypass
- Submerged Orifice Bypass
- Transport Pipes
- Transport Flumes

FISH PASSAGE FEASIBILITY STUDY **The Three Rules of Fish Passage Planning** LOCATION, LOCATION, LOCATION **Fish Behavior** Guided By Flow Guided By Natural Bathymetry or Man Made Structure Site Layout Considerations Bathymetry and Topography **Existing Structures Existing Operations Real Estate Considerations**

FISH PASSAGE FEASIBILITY STUDY

Screening of Alternatives

- Effectiveness
- Fish Passage Effectiveness
- Effect on Hydro Project Operations
- Efficiency
 - Construction Cost
 - Operations and Maintenance Cost
- Acceptability
 - Flood Impacts
 - Environmental Constraints
 - Historical and Cultural Constraints

FISH PASSAGE FEASIBILITY STUDY

Selected Alternatives

- Fishway 1 Menominee & Park Mill
- Downstream Passage Close Spaced Inclined Bar Racks and Surface Bypass
- Fishway 2 Grand Rapids
 - Upstream Passage Fish Lift in Tailrace
 - Downstream Passage Existing Bar Racks and Surface Bypass
- Fishway 3 White Rapids & Chalk Hill
 - Upstream Passage Fish Lift in Tailrace
 - Downstream Passage Close Spaced Bar Racks and Submerged Bypass

WHITE RAPIDS DAM

Fishway 1 Menominee – Park Mills

Downstream Alternative: Incline rack with surface bypass

Available Habitat:

Excellentspawning habitat: 59 acres,Goodspawning habitat: 706 acres,Fairspawning habitat: 0 acres,

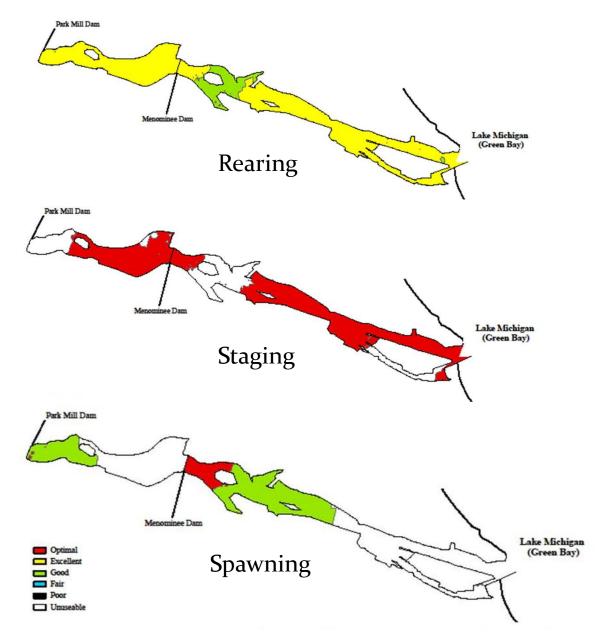

juvenile habitat: 1,742 acres juvenile habitat: o acres juvenile habitat: o acres

Number of lake sturgeon above Park Mills:

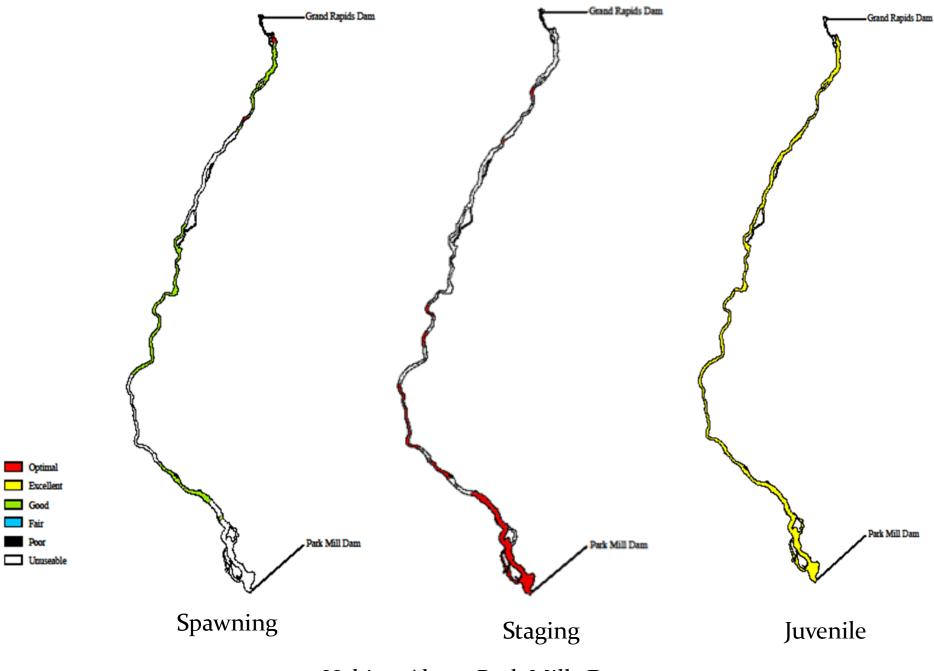

Total length (cm)	<u>2011</u>	
<91	1,362	(1,152-1,572)
>91	713	(603-822)
>107	483	(396-571)
>127	166	(129-203)

Number of lake sturgeon below Menominee:

Total length (cm)	<u>2009</u>	
>91	2,455	(2,214-2,738)
>107	2,286	(2,060-2,553)
>127	1,181	(1,051-1,338)

Habitat Above and Below Menominee Dam

Habitat Above Park Mills Dam

Fishway 2 Grand Rapids

Upstream Alternative: Fish Lift

Downstream Alternative: Existing Trash Racks and Surface Bypass

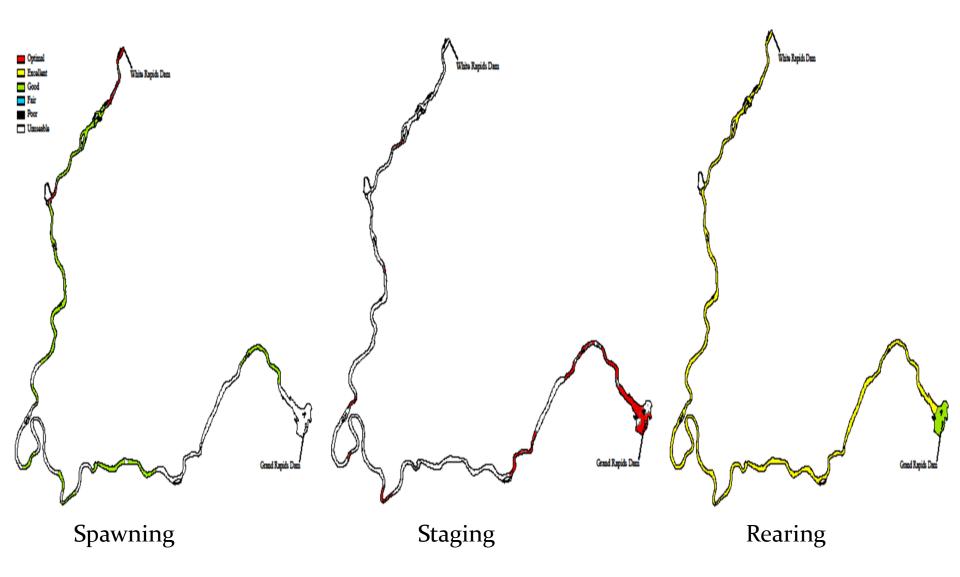

Available Habitat:

Excellentspawning habitat: 100 acres,Goodspawning habitat: 784 acres,Fairspawning habitat: 0 acres,

juvenile habitat: 1,593 acres juvenile habitat: 166 acres juvenile habitat: 0 acres

Number of lake sturgeon above Grand Rapids:

Total length (cm)	<u>2009</u>	
>91	2,627	(2,376-2,925)
>107	1,782	(1,602-2,001)
>127	572	(470-717)

Habitat Above Grand Rapids Dam

Fishway 3 White Rapids – Chalk Hill *Upstream Alternative:* Fish Lift

Downstream Alternatives:

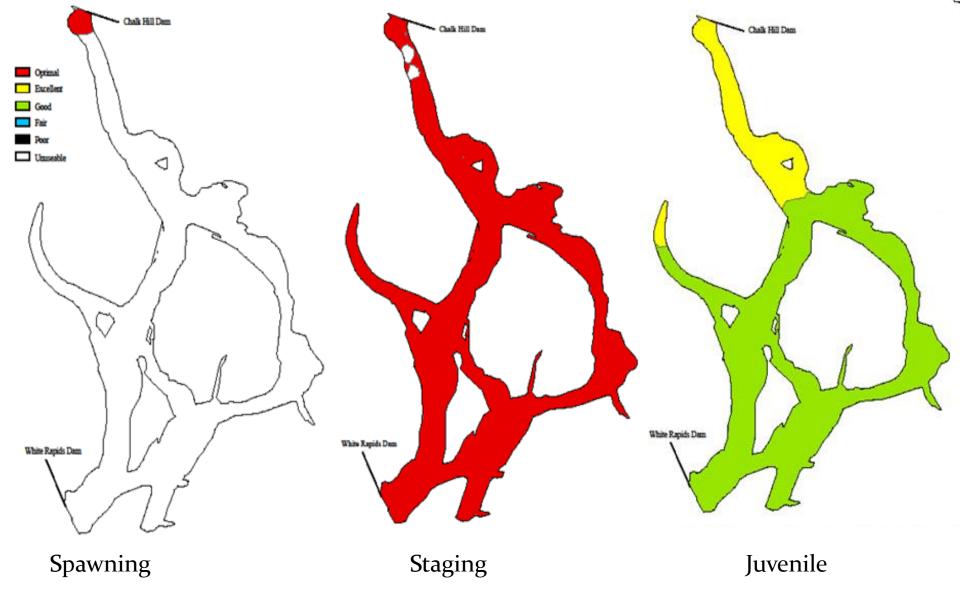

New Close Spaced Trash Racks and Submerged Orifice Bypass

Available Habitat:

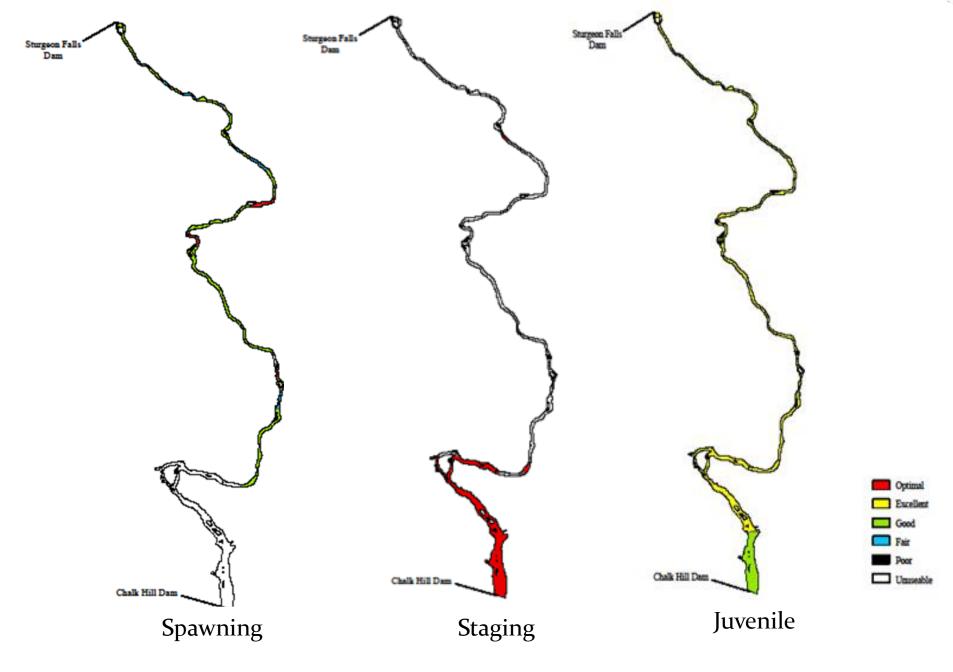

Excellent	spawning habitat:	78 acres,	juvenile habitat:	1,592 acres
Good	spawning habitat:	664 acres,	juvenile habitat:	842 acres
Fair	spawning habitat:	98acres,	juvenile habitat:	o acres

Number of lake sturgeon above White Rapids:

Total length (cm)	<u>1970</u>	<u>1978</u>	<u>1990</u>
<107	2,680	2,543	2,423
>107	185	206	733
>127	115	105	320
>140	57	45	121
>152	20	9	53
>165	2	0	9

Habitat Above White Rapids Dam

Habitat Above Chalk Hill Dam
