

Restoring ecological balance to
North America with beavers.

Adam Burnett
executive director
adam@beaverinstitute.org

Mission

To be a catalyst for:

- advancing beaver management and watershed restoration
- training mitigation professionals
- supporting scientific research
- increasing the public's appreciation of the beaver's critical role in creating climate resilient ecosystems.

Goal

To resolve all beaver-human conflicts in a science-based manner in order to maximize the many benefits that beavers contribute to the environment.

BeaverCorps is the world's first and only professional nonlthal beaver management training program.

Currently, 90 participants in 30 states and 5 Canadian provinces.

All training is remote and virtual. Education is ongoing through peer-to-peer knowledge-sharing.

Landowner Cost-Share Grants

Landowners who hire BeaverCorps trained Beaver Wetland Professionals to install beaver-friendly devices can qualify for these cost-share grants. Over \$75,000 distributed to date to support beaver coexistence.

Boulder, CO

October 19 - 24

The 3rd biennial global conference for knowledge-sharing, restoration and reunion with beaver, featuring presentations, discussion, panels, storytelling, science & art, field trips, and workshops over five days. The conference is an opportunity for multiple paths, disciplines, and backgrounds to converge and collectively learn from, relate to, and imagineer a future of ecological balance with beavers.

Six thematic, active groups working on multiple projects and holding space for knowledge-sharing and connection.
